BOROUGH OF GLASTONBURY

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE YEAR  
ENDED 31ST DECEMBER, 1969

Tel: Wells 3379 (Office)  
Wells 2643 (Residence)

Area Health Department,  
St. Lawrence Lodge,  
37 Chamberlain St.,  
WELLS.  
BA5 2PQ.

6th November, 1970

To The Mayor, Aldermen and Councillors of  
the Glastonbury Borough Council.

Mr. Mayor, Aldermen and Councillors,

I beg to present the Annual Report for 1969 on the health of the Borough, drawn up in accordance with the instructions of the Department of Health and Social Security in Circular 1/70.

The health statistics for the year paint a reasonably rosy picture with steadily increasing population, the highest birth rate for 5 years, a death rate lower than County or National averages, a lowered Infant Mortality Rate and no maternal mortality. The number of Notifiable Diseases reported was the lowest for 5 years.

In common with the rest of the County, the epidemic of influenza (Hong Kong variant) which arrived towards the end of the year after an abortive appearance at the beginning, was as bad as any in the last 20 years. However, thanks to the practice of the Council in offering free vaccination to its staff, employees and councillors, those who accepted this were largely protected, and County health workers were similarly protected by vaccine supplied by the County Medical Officer of Health.

This year saw the opening of the modern Health Centre, incorporating the surgeries of the general practitioners of the town and Local Health Authority clinics under one roof, to the greater benefit of patients and staff.

I am grateful to Mr. King for his detailed and most interesting contribution to the Report and for his cooperation at all times.

In conclusion, my thanks are also due to the Town Clerk, other Officers, Members of the Borough Council and colleagues in the town for their continued support.

I have the honour to be,

Your obedient servant,

D. E. CLARE.

Medical Officer of Health.

# GENERAL STATISTICS. 1969.

Area of Borough (in acres).....	5,019
Population (mid year 1969).....	6,310
Number of inhabited houses.....	2,117
Rateable Value at 1/4/70.....	£267,986
Product of a Penny, Rate at 1/4/70.....	£1,070

## MAIN VITAL STATISTICS FOR 1969.

(With comparative figures for Somerset and England & Wales where available)

• 1. The first part of the paper is devoted to the study of the  
properties of the function  $f(x)$  defined by the equation

$$f(x) = \frac{1}{x} \int_0^x f(t) dt.$$

It is shown that the function  $f(x)$  is continuous and differentiable on the interval  $(0, \infty)$ .

2. In the second part of the paper, the function  $f(x)$  is studied in more detail. It is shown that the function  $f(x)$  is

$$f(x) = \frac{1}{x} \ln x + C,$$

where  $C$  is a constant. It is also shown that the function  $f(x)$  is bounded on the interval  $(0, \infty)$ .

3. In the third part of the paper, the function  $f(x)$  is studied in more detail. It is shown that the function  $f(x)$  is

$$f(x) = \frac{1}{x} \ln x + C + \frac{1}{x} \int_0^x f(t) dt.$$

It is also shown that the function  $f(x)$  is bounded on the interval  $(0, \infty)$ .

4. In the fourth part of the paper, the function  $f(x)$  is studied in more detail. It is shown that the function  $f(x)$  is

$$f(x) = \frac{1}{x} \ln x + C + \frac{1}{x} \int_0^x f(t) dt + \frac{1}{x} \int_0^x f(t) dt.$$

It is also shown that the function  $f(x)$  is bounded on the interval  $(0, \infty)$ .

5. In the fifth part of the paper, the function  $f(x)$  is studied in more detail. It is shown that the function  $f(x)$  is

$$f(x) = \frac{1}{x} \ln x + C + \frac{1}{x} \int_0^x f(t) dt + \frac{1}{x} \int_0^x f(t) dt + \frac{1}{x} \int_0^x f(t) dt.$$

It is also shown that the function  $f(x)$  is bounded on the interval  $(0, \infty)$ .

# NOTIFIABLE DISEASES (5 YEAR PERIOD 1965 - 1969)

## NOTES ON VITAL STATISTICS FOR 1969.

(Although as a general rule the figures are too small for much significance to be attached to them, nevertheless certain broad statements can be made).

### Population

The Registrar-General's statistics show an estimated increase of 30 over the 1968 mid-year population for the Borough and an excess of 47 live births over deaths.

### Births.

Live Births - totalled 27 more than in the previous year with a corresponding rise in the birth rate to a figure well above that for the County and England and Wales. Illegitimate births increased from 6 to 11 and the percentage of these births was higher than County and National rates.

Stillbirths - Only one occurred, as in 1968, and the Stillbirth Rate was considerably better than County or National rates.

### Deaths.

All Ages - fell by 7 from the previous year's total of 76 and the Corrected Death Rate is correspondingly reduced to a figure approximating the County Rate but lower than the National Rate.

Infant Deaths. - were only a third of the total for 1968 and none occurred under 1 week. The Infant Mortality rate approximated County and National figures, whilst the Neo-Natal, Early Neo-Natal and Perinatal Mortality rates were considerably better.

Maternal Mortality - again there was none.

### Primary Causes of Mortality

Cardio-vascular, Cerebro-vascular and Other Diseases of the Circulatory System accounted for 34 deaths, 10 less than in 1968. 22 of these were caused by Heart Disease and 9 by Cerebrovascular Disease, all over the age of 55 years.

Cancer deaths - rose this year to 14, 5 more than in 1968, and as regards site, stomach led with 3 deaths followed by lung cancer with 2.

Respiratory Diseases caused a total of 12 deaths, 7 more than in the previous year, and of these Pneumonia accounted for 6 deaths, bronchitis 3 and influenza 2 deaths.

Accidents - caused 4 deaths, all involving a motor vehicle.

## NOTIFIABLE DISEASES

Nil of note.

### ANNUAL RETURN OF FOOD POISONING AND HUMAN SALMONELLA INFECTIONS.

No cases of food poisoning or human salmonella infection were notified during the year.

### NATIONAL ASSISTANCE ACT, 1948 (Sec.47) and AMENDMENT ACT, 1951.

No cases were reported needing action under the above Acts, but a few elderly persons living in borderline conditions were visited from time to time.

### MILK AND DAIRIES (GENERAL) REGULATIONS, 1959. Sec.20.

No new herd infections were reported during the year, but Heat Treatment Notice discussed in the Report for 1968 had to remain in force as no effort has been made by the farmer to clear the herd.

### MASS RADIOGRAPHY SERVICE.

The Mass Radiography Unit again visited St. Dunstan's Car Park at fortnightly intervals throughout the year for the benefit of General Practitioner referrals and the number of these cases included in the figures below was 114.

	Male	Female	Total
Numbers examined.	188	223	411
Abnormalitiês detected.	5	6	11

### DETAILS OF ABNORMALITIES DETECTED

	Male	Female	Total
Active Pulmonary T.B.	1	-	1

(e) Number of Houses (including isolated farms) relying on a private well supply.		One

DRAINAGE AND SEWERAGE.

Extensions and Improvements during the year.

No extensions or improvements were carried out during the year.

## DRAINAGE AND SEWERAGE

### Sewage and Trade Waste Disposal Scheme.

The Sewage and Trade Waste Disposal Works continue to be hydrostatically overloaded by excessive flows from the two Traders discharging into the Works and also due to the Dry Weather flow of Sewage being higher than for which the Works were designed.

Two series of samples at various parts of the Works were taken to enable the Council's Consultant Chemists to report upon the present operation of the Works under existing flow conditions and he reported to the Council's Consulting Engineers on 9th May and 7th October, 1969.

The Council's Consulting Engineers submitted their first report on 12th December, 1969, indicating works necessary to meet present flow conditions and a supplementary report is expected about mid 1970, following consultations with the Factories after the first report.

The Somerset River Authority gave notice on 19th December, 1969, of a proposed Consent Standard of B.O.D. 20 parts per million and suspended solids of 30 parts per million, in respect of the Mill Stream, based on a Dry Weather Flow for the Works of 200,000 gallons per day and a Daily flow of Trade Waste of 270,000 gallons per day.

### REGISTERED COMMON LODGING HOUSES.

No registered common lodging houses within the Borough therefore no action necessary during the year.

### H O U S I N G .

CHAPTER I

THE HISTORY OF THE

The history of the world is a long and tedious story, but it is one which is full of interest and variety. It is a story which is full of the struggles of the human race, and of the triumphs of the human spirit. It is a story which is full of the deeds of the great men of the world, and of the lives of the great women of the world. It is a story which is full of the adventures of the great explorers, and of the discoveries of the great scientists. It is a story which is full of the wars of the great empires, and of the peace of the great nations. It is a story which is full of the joys of the great cities, and of the sorrows of the great villages. It is a story which is full of the hopes of the great future, and of the fears of the great past. It is a story which is full of the love of the great people, and of the hate of the great enemies. It is a story which is full of the life of the great world, and of the death of the great world.

Since the War, up to the end of 1969 a total of 473 new dwellings have been completed by the Local Authority, 454 by Private Enterprise and 73 units of accommodation have been provided by conversion, adaptation, or reconstruction, and three units of accommodation have been lost, one conversion into business premises and two by conversion of two houses into one to accommodate large families, making provision for 1,000 families in all.

Up to the end of 1969 action has been taken under Section 16 of the Housing Act, 1957, in respect of 129 houses, and in all cases the Owners gave written undertakings in accordance with the Act not to relet them for human habitation when they became vacant. At the end of the year one of these dwellings remained occupied. Six have been reconstructed and brought back into use as dwellings. Eighty-seven houses have been demolished and fifteen houses have been purchased by Agreement and demolished in connection with the Redevelopment of Hill Head Area. Three houses in Old Wells Road and three houses in Northload Street have been acquired and demolished, where action had been taken under the Housing Acts.

ANIMAL BOARDING ESTABLISHMENTS.

Number Licensed. .... Nil .....

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the subject and the objectives of the study.

2. The second part of the report is a detailed description of the methodology used in the study. It discusses the data sources, the data collection methods, and the data analysis methods.

3. The third part of the report is a detailed description of the results of the study. It discusses the findings of the study and the conclusions drawn from the results.

4. The fourth part of the report is a detailed description of the discussion of the results. It discusses the implications of the results and the limitations of the study.

5. The fifth part of the report is a detailed description of the conclusion of the study. It discusses the overall findings of the study and the recommendations for future research.

6. The sixth part of the report is a detailed description of the references. It lists the sources of information used in the study.

7. The seventh part of the report is a detailed description of the appendix. It contains supplementary information that is not included in the main body of the report.

8. The eighth part of the report is a detailed description of the index. It provides a list of the topics covered in the report and the pages where they can be found.

9. The ninth part of the report is a detailed description of the glossary. It defines the terms used in the report.

10. The tenth part of the report is a detailed description of the bibliography. It lists the sources of information used in the study.

11. The eleventh part of the report is a detailed description of the conclusion. It discusses the overall findings of the study and the recommendations for future research.

FACTORIES ACT, 1961.

- (1) Inspections for purposes of provisions as to health  
(including inspections made by Public Health Inspectors)

Premises	Number on Register	Number of		Occupiers Prosecuted
